

Strategic Planning

Align the vision through strategy, tactics, and tasks

1. Size up the environment
2. Explore the landscape
3. Set up the strategy
4. Implement the tactical decisions
5. Deploy the supporting tasks

Bureaucracy is a thing of the past. Resilient organizations align their vision around strategic processes, tactical decisions, and supportive tasks designed to promote organizational preparedness, agility and value.

The rigidity of the strategic planning process is considered budgetary and long term in nature, our thinking is customizable, flexible, and expandable. Our approach is designed to consider the Rhythm of business with the demands of time, stakeholders, and changing demands.

WHAT WE DO

Our approach to strategic planning is based on best practices formed around five tenets. These steps embrace acceleration while providing strategic teams a 360 degree view of the process while aligning processes for success

Our Focus

- Size-up strengths, weaknesses, opportunities and threats
- Explore the business landscape
- Set up a strategy based on competitive advantage
- Implement tactical decisions based on communication and alignment
- Support the action plan through supporting tasks

Organizations frustrated with existing planning processes shift from a pure financial budgeting to a strategic focus, developing flexible approaches, and creating the necessary alignment between business units and processes.

Execution through a well developed strategic plan not only contributes to an agile transformation, but it also creates an atmosphere of transparency, and a quick turn around when new strategic initiatives are required.

First Due Partners provides the necessary tailwind to help your organization succeed through the strategic process.
